Sensitive

**Sensitive** The video product recorded at front end since deployment of the camera at O.P was checked for quality of footage during the hours of darkness. The subject vehicle was found to be not visible at all during the hours of darkness, presumably due to a lack of sufficient ambient light at that location. A further **Sensitive/irrelevant** is suggested to find a suitable location for a camera O.P site much closer to (or within) the car park being viewed. A specialist low-light monochrome camera may be required for night-time coverage, as it is probably not feasible tactically to introduce additional artificial lighting at the location. **Sensitive**
