Thanks [REDACTED] FE16

All make sense. I'll discuss this with the team and get back to you if we need anything else.

Danny

No FA/1 has been submitted yet.....we are still some three and a half weeks away.

We have had a preliminary discussion (SFC and TFC) with SCO19.....and if the intelligence remains valid.....the intention would be to conduct surveillance on the mission vehicle.....TSU/CONVENTIONAL supported by SCO19

A separate conventional surveillance operation would be conducted on the targeted vehicle supported by SFOs, with the contingency of overt ARVs as a disruption should we lose control of the mission vehicle.

It is the intention to run this operation from 3000

We would like a live feed from the mission vehicle into 3000 to assist the TFC in his decision making. Clearly the more information I have the better.

I anticipate a further meeting with SCO19 about a week before, to which you would be more than welcome.

Hope this makes sense

All,

FYI as I'm A/L from tonight for 2 weeks.

Sparky,

Can you liaise with Danny - as below.

Thanks

Rob

Afternoon Rob,

With regards to the above operation, I would be really grateful if you could please send me a copy of the FA/1 along with any associated Tac/Advice you may have received. If this has yet to be done and it is going to be discussed in conference with SC&O19 (CO5), can we please be invited to attend the meeting?

I'm keen to ensure that the SFC is aware of the operating capability of the technical equipment as this may have an impact on their decision making. Some equipment can be temperamental and therefore may not be suitable in certain operations. I'm keen to ensure that we support the operation in whatever way possible but if the current proposed tactic is not going to be supported by the SFC, I'd rather know in advance so we can save time on the lengthy deployment but also ensure that we are supplying kit that is in keeping with any revised plan.

Hope this makes sense. If not, please drop me a line or give me a call.

Many thanks

Danny
