Message: I am the surveillance commander for this operation.

There are 3 surveillance teams deployed on this operation 2 of which are armed.

They are:-

SCO35 Team 6 - Armed - Ch 174b - Audi
 SCO35 Team 12 - Armed - Ch 174 a _ Prison van
 SCO35 Team7 - Unarmed - Subject Borg

There was an overarching briefing given to staff on the 10.12.15 attended by the 2 armed teams and the team leader from the unarmed team. All teams received separate briefings this morning prior to their operational deployment. I have spoken to all of them and they are happy with their role in this operation and that they are appropriately briefed. An operational risk assessment is in place for this operation and generic corporate risk assessments are in place for the roles that surveillance officers will be performing on this operation.

Surveillance operations particularly those with multiple teams are dynamic and fast moving. I will endeavour to use the clio system to record my decisions and rationale. However this will not be to the detriment of my ability to manage the surveillance resources appropriately and communicate messages to the teams and the surveillance monitors.

The Surveillance authority for this operation was given by DSU Gilmore, the SFC is DSU ~~██████████~~ the TFC is DCI ~~██████████~~ *FE14* *FE16*

There are 2 armed teams on this operation and one unarmed team, that is in response to the roles that the teams are performing.

The overza
